

ORGANIC COMPOST

The times they are a-changin'. As many New Zealand farmers are moving toward practising a more natural way of farming, their attention is shifting to their soils.

Years of using chemical fertilizers may have helped crop yields and pasture production, but there is a distinct sense that many soils have become dusty, lacking in structure and organic matter.

There's an easy fix though. Applying Living Earth organic-certified Compost to the soil stimulates and improves soil health. Soils become rich with organic matter, helping moisture retention and providing an ideal environment for roots of young plants to establish quickly.

PRODUCT SPECIFICATIONS

Element	%	When compost is applied 10t/ha at 35% moisture
Nitrogen	2.2	132kg N
Phosphorus	0.45	23kg P
Potassium	1.2	72kg K
Sulphur	0.22	13kg
Calcium	2.6	169kg Ca
Magnesium	0.4	24kg Mg
Sodium	0.2	12kg Na

DISTRIBUTION

Living Earth Compost can be freighted to your farm by truck and trailer, or truck only. You will need to contact us to discuss spreading options.

To obtain a quote for your farm, we need the following information:

Type of farm
Area to be spread
Location of farm in Canterbury region

INGREDIENTS

- ✓ Living Earth Compost is made from the organics collection in Christchurch City.
- ✓ The compost is 100% organic and conforms to the New Zealand Standard NZS4454.
- ✓ The compost is aged, tested and is available for sale to the Canterbury rural sector.

Living Earth compost is certified organic by Asure Quality
